Complete Trucking Solution

Preferred Logistics is the trucking branch of the Preferred Network. You can rely on our experienced team to assist you with all your domestic trucking needs.

Less-than-Load (LTL)

Pay for only the space you need with LTL. We offer an easy-to-use TMS system and competitive rates with many regional & national carrier rates.

Partial Truckload (PTL)

PTL is a cost-effective and flexible transportation solution that allows a more direct route for shipments that do not require a full truck.

Sprinter Van

Ideal for time-sensitive or smaller shipments, our sprinter vans offer fast, flexible delivery with nationwide coverage.

Full Truckload

Our comprehensive truckload network means we have access to a broad range of equipment across the United States including dryvans and flatbeds.

Specialized & Project Freight

From beginning to end you can depend on us to support your team on those projects that need extra attention.

Responsive Customer Service

Our customers are priority #1. We respond quickly to every call and email, handling communication with carriers so you don't have to.

Our free online shipping platform makes it easy for you to quote, create shipments, and schedule pickups with dozens of national and regional carriers.

Proactive review of Pickups and BOLs help to ensure a positive experience and avoid re-class and re-bills.

Shipping Made Easy

- » Easily make and monitor your LTL shipments on our online shipping platform.
- » Receive automatic email notification and alerts on your FTL & PTL shipments for full visibility.
- » Get prompt responses to your calls and emails from our experienced customer service teams.

Competitive Rates

Through our national volumes, we are able to offer carrier, rate, and service options from dozens of national and regional carriers to meet your shipping needs.

By forecasting price per mile rates, we ensure our FTL & PTL quotes are within market conditions.
